QUICK OVERVIEW

Many organizations struggle to identify where sensitive data is stored, leaving them exposed to compliance risks and potential breaches. EzSecure provides automated discovery and protection, ensuring businesses have full visibility and control over personal and confidential information.

SOLUTIONS

EzSecure reports are built for varied audiences. Identify your stakeholders, then share the compliance and risk insights most relevant to them.

Sensitive Data Discovery

Data Compliance

Security Posture Reporting

BENEFITS

1 **Intelligent Data Discovery**

Automatically discover and classify sensitive data across databases, endpoints, and cloud systems to strengthen data security.

2 **Simplified Compliance**

Stay audit-ready with ease by supporting major standards like GDPR, HIPAA, PII, PCI, and SPII, while reducing compliance risks through clear, automated reporting.

3 **Tailored for Industries**

From healthcare, finance, retail, IT, and government, EzSecure provides adaptable data security solutions for diverse industries.
